## HOME

Almost five years ago, the Association introduced the new idea called *IRI Analytics*. The *traditionalists* were *skeptical* and they *lost* the best opportunities to get ahead of the curve and *today* the *nightmares* became *realities*. *IRI Analytics*—is the new mindset, approach and new ways to cope with **ultra competitive business** environment. It can be implemented successfully at institutions supported by *Data Scientists* with IRI Analytics knowledge and skills, *Data Mining* experience and *Big Data* expertise. After the first IRI/Education Analytics paper and book were presented and published, practically the new concept became one of the most important new mindset ever developed in the effectiveness and Analytics profession. Our
